

# EPA COMPLIANCE

## To the Point

**FLUID LOCK™**  
BALL VALVES

EPA continues to make strides with the new PCC August 16, 2011 ruling.

TSPA meeting scheduled for February 8-10 in Boise, ID .

**STAINLEZ™**

- New IBC and Drum Parts
- New IBC label designs
- Next Day Delivery
- Low Cost Products
- Knowledge/Expertise

## *Stainlez and EPA Compliance*

Stainlez entered into Agricultural IBC parts development in 2009 with the design of our one-way valve, Ag plug, and tamper seals and lids. Since then we have quickly become a leader in developing IBC and drum parts that fit the AG industry.

Our **Tamper Evident AG Plug** allows fillers to repack their products into the IBC and seal the 6" fill lid knowing that the previous contents in the IBC have not been comprised. The AG plug is simple to use and allows enough air flow to pump out the IBC without collapsing the bottle. We stock both the buttress and NPS versions.

### **The EPA PCC Rule**

The EPA published a ruling called the Pesticide Container and Containment (PCC) rule in August 2006 and made minor amendments to the rule in October 2008, before finalizing compliance in August 2011. The rule seeks to:

- Minimize human exposure to pesticides while handling containers
- Facilitate disposal & recycling of pesticide containers
- Protect the environment from pesticide releases at bulk storage sites and from spills & leaks when refilling/dispensing pesticides

### **Portable Refillable Containers**

- Registrants are responsible for ensuring that portable refillable containers (minibulks, totes, shuttles, IBCs, etc.) are;
- DOT PG III design, construction, & marking requirements
  - Marked with a serial number or other identifying code
  - Have a one-way valve or tamper-evidence or both on openings

Pesticide container & containment web site:

<http://www.epa.gov/pesticides/regulating/containers.htm>

### **Tamper Evident AG Plug**

PN: STGBCBG-Buttress

PN: STGNCBG-NPS

### **Features**

- Allows proper air flow for pumping
- Cannot be removed from lid opening without breaking
- Ensures sealed opening in the lid of the IBC with locks or seals
- Low Cost and affordable solution
- Available in buttress or NPS threads
