Container Traceability Instructions

Stainlez tracks all outbound containers to help manage where the container is last shipped to and be able to trace back the date of testing and the operator that over saw the test. Stainlez uses SecureTracs systems in order to manage this information.

Label Information

Each container label has five items of data to help comply with DOT and provide a method of traceability back to Stainlez;

- 1. CONTAINER COLLECT-** We offer free collection service to you and your customers. When the customer calls to have us collect the container we provide a free service to pick them up. In exchange if the volumes are Truck loads we will provide a credit back to the customer for their next order of containers with us.
- 2. TEST INFORMATION-** 49 CFR § 178.813 states that we have inspected the container and ensured it has been pressure tested according to DOT standards. We do this through a pressure differential system that tests 100% of containers to the 2.9 psi standard.
- 3. DOT REGISTRATION-** Our companies have been registered with DOT as a reconitioner of hazmat containers. Stainlez's DOT number is M5633 and Cropland Container's is M5962. This ensures our customers that our sites have had formal DOT awareness training and maintain all DOT records in compliance with the CFR.
- 4. DATE OF TEST AND QC-** Every container must be pressure tested to CFR and inspected for quality defects. Upon completion, the operator prints the month and year in the blank boxes on the label.
- 5. UNIQUE CONTAINER BAR CODE AND NUMBER-** We have partnered with SecureTracs Inc. to develop a container tracking system. SecureTracs was developed to record the container date of shipment, the customer, BOL, ship to location, and DOT Marking. This information is recorded into the database to maintain DOT compliance, shipping info, and location information to help with tracing back quality issues. There are two bar codes, one peels off and is placed on the bottle and the other remains on the cage.

Visit our web site at www.stainlez.com and choose the equipment category for various torque wrenches.

Stainlez Inc. is located in Minneapolis, MN with a staff that is specialized in IBC and Drum Parts/Fittings design, development and sales. Our mission is to give the customer the best quality parts and service at the lowest possible price with the best technical advice. We can be reached through our web site at www.stainlez.com or by contacting us at **(877) 971-7987** to help you with all your Industrial Container Parts Needs.
